Actionee Project (H. Folts)

Sub Category Project Requirements

Subject WWW dependency

## Description of Problem or Suggestion:

The WWW is increasing its user base exponentially with associated degradation. In addition each U.S. hub on the "Internet" has been compromised, security wise, during the past 10 months.

## Originator's Recommendation

Guarantee that no operational activities depend on the Internet or "WWW".

GSFC Response by: Andy Germain

GSFC Response Date 4/17/95

Agreed. There are definite plans that all 'Operational' (command and control) and Inter-DAAC production traffic use private networks. Internet will be used only for user access.
